Technical Skills

Javascript (ES5/ES6), React, Redux, jQuery, HTML, CSS, Bootstrap, Git, and Github

Applications Developed

Scoreboard app [Github](#)

- Scoreboard application which displays NBA standings and daily boxscores of regular and postseason games. Future implementations to include MLB boxscores and standings.
- Developed in React, Redux, Bootstrap, Express and Node. Utilized a node library (nba.js) to access current and historical NBA data.

Connect 4 game [Live Github](#)

- Connect 4 game with a Super Mario theme that has special board pieces and true multiplayer, created by a team of three developers completed in a two day timespan.
- Developed in Javascript, jQuery, HTML, Firebase, and CSS/Bootstrap.

Bar Crawl app [Live Github](#)

- App that helps users plan a local bar crawl. Created by a team of four developers completed in a two day timespan.
- Developed in Javascript, jQuery, HTML, and CSS/Bootstrap. Utilizes various APIs such as Google Maps, Google Directions, Yelp, and Geocoder.

Calculator [Live](#)

- A mobile-responsive calculator with basic calculator functionality.
- Developed in Javascript, jQuery, HTML, and CSS/Bootstrap.
