## Technical Skills

Javascript (ES6), React, Redux, FireBase, jQuery, HTML, CSS, Bootstrap, and Git

## Applications Developed

*Scoreboard app* [Live Github](#)

- Scoreboard application which displays NBA standings and daily boxscores of regular and postseason games. Future implementations to include MLB boxscores and standings.
- Developed in React, Redux, Bootstrap, Express and Node. Utilized a node library (nba.js) to access current and historical NBA data.

*Connect 4 game* [Live Github](#)

- Connect 4 game with a Super Mario theme that has special board pieces and true multiplayer, created by a team of three developers completed in a two day timespan.
- Developed in Javascript, jQuery, HTML, Firebase, and CSS/Bootstrap.

*Bar Crawl app* [Live Github](#)

- App that helps users plan a local bar crawl. Created by a team of four developers completed in a two day timespan.
- Developed in Javascript, jQuery, HTML, and CSS/Bootstrap. Utilizes various APIs such as Google Maps, Google Directions, Yelp, and Geocoder.

*Student Grade Table* [Live Github](#)

- Built an application which helps users add, delete and track grades and courses for students.
- Developed in React, Javascript, Firebase, Bootstrap, CSS, and HTML.

*Calculator* [Live Github](#)

- A mobile-responsive calculator with basic calculator functionality.

## Professional Experience

*IT Technician, Amazon Store - Alcala Accessories*

2013 - 2017

- Managed various online tools within store to increase efficiency. Sales grew by 20K annually.
- Utilized multiple software systems to organize and perform daily work to maintain online store.
